

THE CANNABIS ORGASM HACK NO ONE TALKS ABOUT

Did you know there is a specific way to use cannabis that doubles orgasm intensity - The problem is that most people do not use cannabis with intention. Using it with intention means using it specifically and intentionally before sex to enhance your sexual experience. I mean look cannabis has been used to enhance sex for thousands of years! Yes thousands of years!.

Next time you plan to have sex – solo or partnered – plan to use cannabis too. Here's how you do it. Try The Goldilocks Technique – remember Goldilocks – looking for the right bed? Your goal is find the right time to use it before having sex, and the right dose. Use the Goldilocks technique until you find the exact right amount to use and the timing of your use – Here's an example of a woman who found her Goldilocks..."I take one quarter of a homemade brownie 45 minutes before we plan to have sex.

Its like cooking the perfect steak - timing matters as much as quality.

Set a timer when you dose and how much cannabis you used to find your Goldilocks!

The benefit is to sync peak effects of the cannabis with peak arousal. :

- No more "too early/too late" frustration
- Consistent, predictable enhancement at your fingertips

Set a timer when you dose with notes on your dosage too to track your ideal window.
